

Physiology 422 Records presents the debut song written by Kwan Tien Loh...

Because I Went High
(As sung to “Because I Got High” – by Afroman)

It’s like...I’m at high altitude man!
Just another foot...

I was gonna go to ski, until I went high...
I was able to see in the dark, but then I went high...
My rods are still messed up, and I know why...
‘Cause I went high (repeat 3x)

I was totally eupneic, before I went high...
I had a pH of 7 point 4 but I went high...
I’m excreting bicarbonate, and I know why...
‘Cause I went high (repeat 3x)

My blood was perfectly fine, but then I went high...
Erythrocyte counts were normal, but I went high...
My right heart’s starting to fail, and I know why...
‘Cause I went high (repeat 3x)

I was gonna get some sleep, before I went high...
I wasn’t gonna vomit and lose my senses, but then I went high...
Acute Mountain Sickness, and I know why....
‘Cause I went high (repeat 3x)

I wasn’t gonna gurgle and rattle but I was high...
My heart rate was gonna be normal but I was high...
Now I’m turning blue, and I know why...
Because I went high (repeat 3x)

My mental status was fine until I went high...
My cerebrum wasn’t gonna swell, but then I went high...
I’m failing sobriety tests, and I know why...
Because I went high (repeat 3x)

At 67,000 feet, I think I’m real high...
The air pressure’s 47, I must be so high...
My blood is starting to boil, and I know why...
‘Cause I went high (repeat 3x)

I messed up my entire trip, because I went high...
I lost my consciousness, because I went high...
Now I’m being airlifted, and I know why...
‘Cause I went high (repeat 3x)

I’m-a stop singing this song, because I’m high
I’m singing this whole thing wrong, because I’m high
And if I don’t get bonus marks, I’ll know why...
‘Cause I’m high! (repeat 3x)
